BG191606 - \$335.00 (10% PROTOCOL)  
BG191606n - \$473.00 (20% PROTOCOL)

**The difference between NATO (20% ) & FBI (10%) calibrated gelatin is density.**

NATO gelatin is a 20% solution and FBI is 10% solution. NATO ballistic gelatin must be harder because they only use full metal jacket bullets, FMJ. All of our Clear Ballistic Gelatin blocks replace standard 240A ordnance gelatin.
